3HOST
RESPONSIVE LANDING PAGE FOR A
TECHNOLOGY AND HOSTING COMPANY
WITH WHMCS TEMPLATE INTEGRATION
by IwThemes

General documentation and how-to guide for
setting up and customizing 3Host.
Version 1.2

Thank you for purchasing one of our themes!

Thank you so much for purchasing this theme. I'd be glad to help you if you
have any questions relating to this theme.
We hope you will enjoy working with one of our themes.

support@iwthemes.com

STARHOST

1.Getting Started

1.1. Before Start

Before start you should have a basic knowledge in html, css3. Is very easy to configure, remember that you can contact us and do your questions, well. We recommend to use as editor [sublime text.](#)

You can view this template in any web browser from your desktop computer. Because the files are written in HTML, you do not need an internet connection in order to display or edit the template.

Once you have downloaded the files from ThemeForest, open the html folder. this folder you will find three folders js, css, img, you will find 3 html.

1.2. Installation

- It's important to understand that you must either have your own server space or use someone else. The server space can be purchased at many different places around the internet. You need somewhere to put the files that you purchased so others can find them online.

- Start your FTP client (I personally use Filezilla which is free) and login. Login to your server. You will need your server name (often times this will be your domain name), username, and password that you setup with the hosting company.

- Find the folder you want to upload domain template files to your server. You will want to click and drag all the files that you have marked. within the html folder, which includes the 4 folders (css, img, js and php) files. html you want to display.

- Once the files are made up, you can access the site.

1.3. Html Structure

This theme has a responsive design with variation of column layouts depending on the page.This theme is based on bootstrap 3.3.5 - 1170px (12 columns), which will help streamline any customization you want to perform. If you are unfamiliar with grid system, be sure to read about it [here](#).

The main structure of this site is wrapped in a "container" div, followed by a "row" div. These div Within each section is given a site's home grid size equaling all 12 columns long.

This topic has the following structure has a slide or section, and footer content, this is the following structure:

```html
<!-- Top Panel -->
<div class="top-panel static">
    <div class="row">
        <div class="col-lg-6 col-md-6">
            <ul class="list-inline top-panel-info">
                <li><a href="#"><i class="fa fa-mobile"></i> +1234567890</a>
                <li><a href="#"><i class="fa fa-envelope-o"></i> support@iw1
            </ul>
        </div>

        <div class="col-lg-6 col-md-6">
            <!-- Social Panel -->
            <ul class="list-inline right top-panel-social">
                <li><a href="#"><i class="fa fa-vimeo"></i></a></li>
                <li><a href="#"><i class="fa fa-server"></i></a></li>
                <li><a href="#"><i class="fa fa-twitter"></i></a></li>
                <li><a href="#"><i class="fa fa-facebook"></i></a></li>
            </ul>
            <!--/Social Panel -->
        </div>
    </div>
</div>
<!--/Top Panel -->

<!-- Menu - Logo -->
<div class="menulogo-panel static">
    <div class="row">
        <div class="col-lg-5 col-md-4">
            <div class="logo">
                <h1><a href="index.html">StarHost</a></h1>
            </div>
        </div>
        <div class="col-lg-7 col-md-8">
            <ul class="list-inline right menu">
                <li><a data-scroll href="#slider">Home</a></li>
                <li><a data-scroll href="#services">Services</a></li>
                <li><a data-scroll href="#company">Company</a></li>
                <li><a data-scroll href="#pricing">Pricing</a></li>
                <li><a data-scroll href="#promo">Promo</a></li>
                <li><a data-scroll href="#contact">Contact Us</a></li>
            </ul>
```

4

1.4. Css Structure

We are using a master file of CSS (style.css). he ten additional stylesheets.

Style sheets are located in the folder "CSS" and its subfolder, Only recommended modifying the file in which will be able to change the theme colors, and is in css / skins / name_color.css

We have a content list:

```
/* ==============================
    - Template Name: StarHost | Responsive Landing Page for
    - Autor: Iwthemes
    - Email: support@iwthemes.com
    - Name File: style.css
    - Version 1.0
    - Website: http://www.iwthemes.com
    - Copyright: (C) 2016

    ----------------------------------
    Stylesheet Guide
    ----------------------------------
    1. Import styles
    2. Preloader
    3. toTop
    4. Header
        4.1. Top Panel
        4.2. Menu - Logo
        4.3 Search Domain Header
    5. Content
        5.1. Buttons Fixed Contact(mail) - Chat
        5.2. Services
        5.3 About
        5.4 Testimonials
        5.5 Pricing Tables
        5.6 Plus Service
        5.7 Contact Information
        5.8 Information Highlighted
    6. Footer
```

1.5. Javascript Structure

The Javascript folder is "js" and Inside it, there are folders, too. the name of each folders does references to the function of each files.

For example, in the folder "js" there is a folder with name "fancybox", this folder does reference to the lightbox's functions.

Also, in the javascript folder there are one files called "main.js", this file executes the functions of the scripts that are in the folders.this file is divided with the next structure:

```
<!-- ========================= JQuery libs ========================= -->
<!-- jQuery local-->
<script type="text/javascript" src="js/jquery.js"></script>
<script type="text/javascript" src="js/jquery-ui.1.11.3.min.js"></script>
<!-- Bootstrap.js-->
<script type="text/javascript" src="js/bootstrap/bootstrap.min.js"></script>
<!-- Carousel -->
<script type="text/javascript" src="js/carousel/carousel.js"></script>
<!--Scroll Nav-->
<script src="js/scroll/smooth-scroll.min.js"></script>
<!--Wow Animations-->
<script src="js/animations/wow.js"></script>
<!--Theme Options-->
<script src="js/theme-options/theme-options.js"></script>
<script src="js/theme-options/jquery.easing.1.3.min.js"></script>
<script src="js/theme-options/jquery.cookies.js"></script>
<!--Lightbox-->
<script type="text/javascript" src="js/fancybox/jquery.fancybox.js"></script>
<!-- Main-->
<script type="text/javascript" src="js/main.js"></script>
<!--Extensions of revolution slider-->
<script type="text/javascript" src="js/slide-revolution/jquery.themepunch.tools.min.js"></script>
<script type="text/javascript" src="js/slide-revolution/jquery.themepunch.revolution.min.js"></script>
<script type="text/javascript" src="js/slide-revolution/extensions/revolution.extension.slideanims.min.js"></script>
<script type="text/javascript" src="js/slide-revolution/extensions/revolution.extension.actions.min.js"></script>
<script type="text/javascript" src="js/slide-revolution/extensions/revolution.extension.layeranimation.min.js"></script>
<script type="text/javascript" src="js/slide-revolution/extensions/revolution.extension.navigation.min.js"></script>
<script type="text/javascript" src="js/slide-revolution/extensions/revolution.extension.parallax.min.js"></script>
<script type="text/javascript" src="js/slide-revolution/extensions/revolution.extension.video.min.js"></script>
<script type="text/javascript" src="js/slide-revolution/extensions/revolution.extension.kenburn.min.js"></script>
```

2.Custom

2.1. Skins Theme

javascript via:

If you want to change some color in the website, you should go to this url **js/theme-options/theme-options.js** you will find some like this:

```
// Skin
var skin = "magenta-dark"; // magenta-dark,
yellow, blue, orange, green

// Layout
var layout = "layout-wide";
// layout-boxed,layout-boxed-margin,
// layout-wide,layout-boxed-wide

// Background
var bg = "none";  // none,bg1,bg2,bg4,bg5,bg6,bg7
```

and just change per color that you want (magenta-dark, yellow, blue, orange, green)

If you want to change by color 'yellow' only you need to change

```
var skin = "yellow";
```

the same way happens if you want to change the layout or background

css via:

Also, if you want a different color,go to **css/skins/** and duplicate the file and replace the color for yours:

```
.btns-fixed ul li:hover,
.box-services-active li .btn-link, .btn-link,
.resalt-zone,
.list-features-plus ul.left li::before,
.list-features-plus ul.right li::after,
.search-domain .searchrev input[type="submit"],
#theme-options .openclose:before,
.searchrev input[type="submit"], .static,
.info-highlighted .text-big i,
.text-list ul li::before{ background-color:
#0dace3 !important; }
//change by your prefer color
```

if you have doubts please, write to support@iwthemes.com

2.2. <u>Carousels</u>
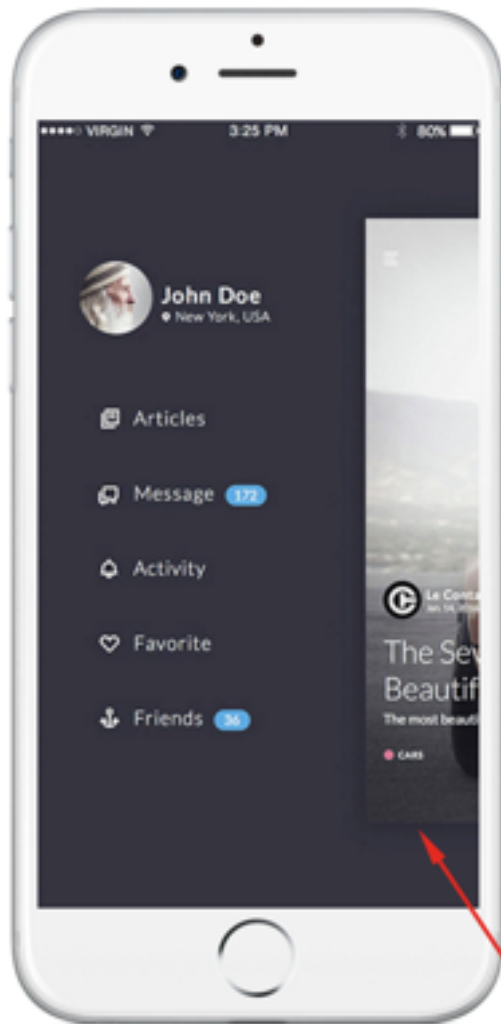

This theme has two carousels:
- carousel installations

Line 29!

```
$('.carousel-installations').owlCarousel({
    loop:true,
    margin:10,
    nav:false,
    autoplay: true,
    autoplayHoverPause: true,
    autoplayTimeout: 5500,
    animateOut: 'fadeOut',
    responsive:{
        0:{
            items:1
        }
    }
})
```

- carousel panel previews

Line 44!
```
$('.carousel-panel').owlCarousel({
    loop:true,
    margin:10,
    nav:false,
    autoplay: true,
    autoplayHoverPause: true,
    autoplayTimeout: 5500,
    animateOut: 'fadeOut',
    responsive:{
      0:{
        items:1
```
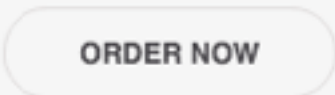

```
        }
      }
    })
```

you can find the customize in both cases in folder **js/main.js**

If you want see more options, go to link (this is the documentation of carousel). Also you could write us to support@iwthemes.com for more help.

2.3. **Buttons**

CHECK	class *"boton-submit"* example: `<input type="submit" class="searchsubmit" value="Check">` and you give it the styles.
NEW TICKET	class *"btn-link"* example: `<a href="#" class="btn-link">new ticket</a>`
ORDER NOW	class *"btn-link-border* example: `<a href="#" class="btn-link-border">Order Now</a>`

2.4. <u>Contact Form</u>

The file that you need is located in *php/send-mail-contact.php*

```php
<?php
    $to = "jm@iwthemes.com"; /*Your Email*/
    $subject = "Messsage from Enter"; /*Issue*/
    $date = date ("l, F jS, Y");
    $time = date ("h:i A");
    $Email=$_GET['email'];
    $Name=$_GET['name'];
    $Subject=$_GET['website'];
    $Message=$_GET['message'];

    $msg="Message sent\n
Email : $Email\n
Name : $Name\n
Subject : $Subject\n
Message : $Message\n";

    mail($to, $subject, $msg, "From: $_GET[email]");
    echo "<div class='alert alert-success'>Thank you for your message :D<

?>
```
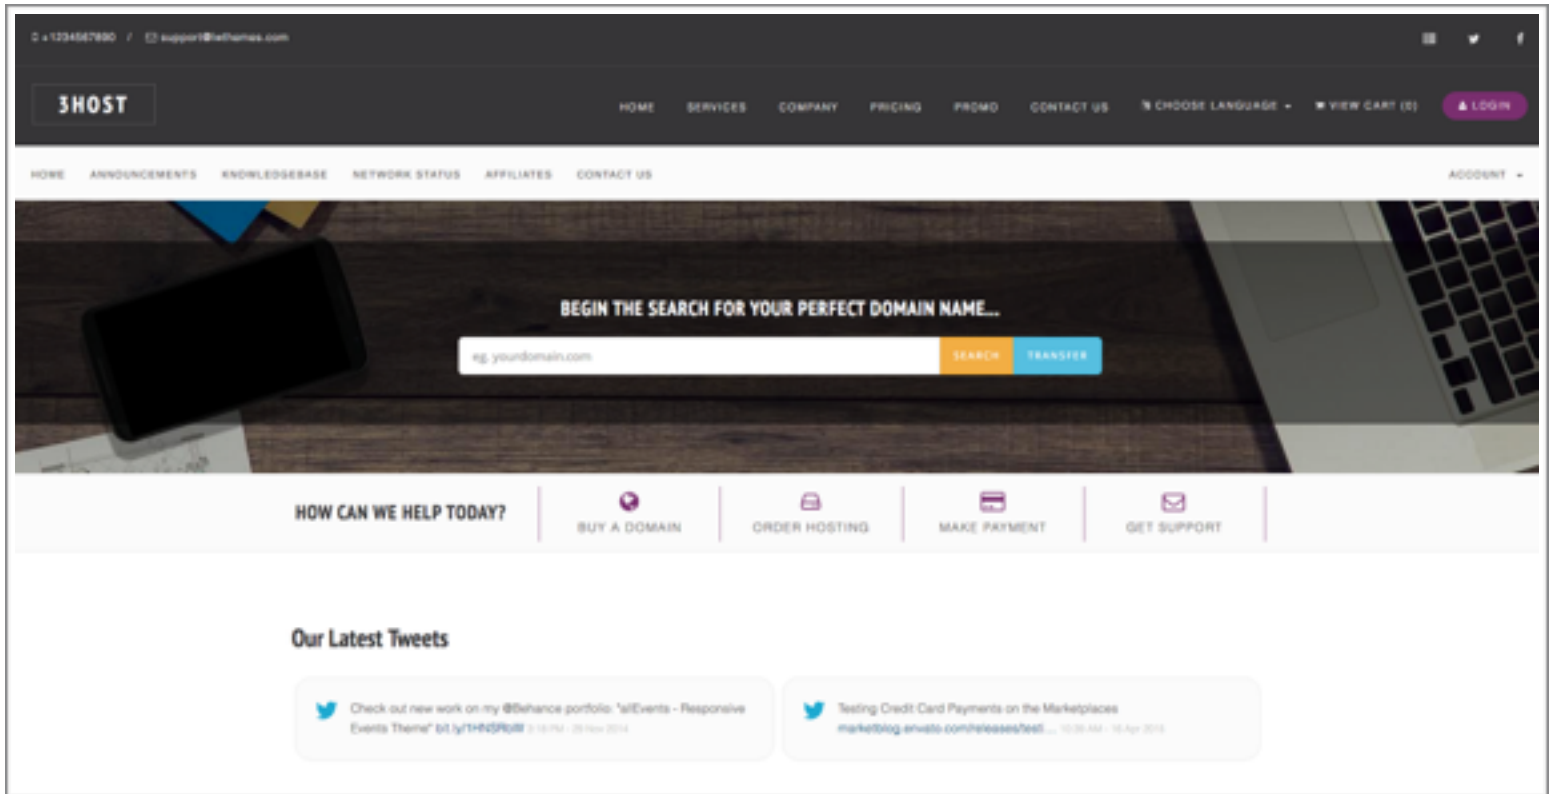

3. <u>Whmcs Template</u>

When you download the 3Host theme you will find 2 more folders:

- Html : This is the default theme.

- Whmcs: Here there is all integration about whmcs platform. There are a lot of files with .tpl extension and a css, img, includes and js folders.

3.1. <u>Customising the Design/Layout - Header & Footer</u>

The "header.tpl" will include all this part:

and "footer.tpl" this part

To change the general info in the footer, please only edit this fragment

```html
<!--Footer-->
<footer>
    <div class="container">
        <div class="row">
            <div class="col-lg-3 col-md-3 col-sm-3 col-xs-6">
                <h4>More About Us</h4>
                <ul class="list-unstyled">
                    <li><a href="#">Our Team</a></li>
                    <li><a href="#">Our History</a></li>
                    <li><a href="#">Media/Press Kit</a></li>
                    <li><a href="#">Partners</a></li>
                    <li><a href="#">Awards</a></li>
                </ul>
            </div>
            <div class="col-lg-3 col-md-3 col-sm-3 col-xs-6">
                <h4>Facilities</h4>
                <ul class="list-unstyled">
                    <li><a href="#">Our Team</a></li>
                    <li><a href="#">Our History</a></li>
                    <li><a href="#">Media/Press Kit</a></li>
                    <li><a href="#">Partners</a></li>
                    <li><a href="#">Awards</a></li>
                </ul>
            </div>
            <div class="col-lg-3 col-md-3 col-sm-3 col-xs-6">
                <h4>Related Links</h4>
                <ul class="list-unstyled">
                    <li><a href="#services">Services</a></li>
                    <li><a href="#company">Company</a></li>
                    <li><a href="#pricing">Pricing</a></li>
                    <li><a href="#promo">Promotion Plus</a></li>
                    <li><a href="#contact">Contact Us</a></li>
                </ul>
            </div>
            <div class="col-lg-3 col-md-3 col-sm-3 col-xs-6">
                <h4>3Host Is Global</h4>
            </div>
        </div>
    </div>
    <!--Image Map-->
    <div class="image-map">
        <img src="{$WEB_ROOT}/templates/{$template}/img/content-general/map.png" alt="map">
    </div>
    <!--Image Map-->
</footer>
```

This is the url you need to use for add or edit an image:

{$WEB_ROOT}/templates/{$template}

then, go image folder - img - and paste the image you want to use

/img/content-general/map.png

as you see in the file:

```
<!--Image Map-->
<div class="image-map">
    <img src="{$WEB_ROOT}/templates/{$template}/img/content-general/map.png" alt="map">
</div>
<!--Image Map-->
```

The same happens to edit the header information.

Note. If you have questions or doubts before any change write to support@iwthemes.com, here we could help you.

3.2. Include Files
Common to All Pages

head.tpl -

Defines the CSS & Javascript files included within the <head> section of a page

navbar.tpl -

Controls the output of the primary navigation bar menu items

sidebar.tpl -

Controls the output of the sidebar menu items

Note.

If you need more info go to documentation site: http:// docs.whmcs.com/Customising_the_Six_Theme
